

This handbook comprehensively covers topics in international relations, with a specific focus on China-Europe-Africa relations. This triangular relationship brings substantial contribution for the formation of an emergent new international order. With China being the second largest economy, and a growing power in military, technology, trade and cultural relations, the book provides decisive research on the key aspects that ground the country's external relations with Europe and Africa.

The first three parts of the book covers issues related to strategy, economy, and security, with specific case studies. In addition, the fourth part, not only focuses on China-Europe-Africa, but also extends to chapters on multilateralism and relations with other countries, regions, and economic communities. In doing so, the book also addresses topics on the Ukraine war, Covid-19, the Belt and Road Initiative, the Global Gateway, and the balance of major powers.
